The practical, uncomplicated design of the Kun **Original** shoulder rest is based on our earliest handmade model. This rest is adjustable in three directions, and the end members are fitted with a patented locking device to ensure that it will not fully rotate to touch the instrument.

The Kun Original has remained the favourite of amateur and professional players alike.

The Kun **Super** rest features an elegant, streamlined shape and simplified size-adjusting mechanism to permit finite adjustment. The Super has slightly different radii, allowing players to choose a rest with, in effect, customized comfort. This lightweight model has become a favourite among the most discriminating players.

The product of two years of research, development and testing, the **Solo** combines pizzazz and practicality. It features a simplified, quick-adjust finger lever that provides ultra-fine size adjustment and eliminates screws. Greater width on the shoulder end gives the Solo added comfort, and a new collapsing mechanism with recessed and integrated drums means its 'feet' can be folded easily for storage. Patterned cut-outs in the Solo's sponge rubber enhance its grip on the player's shoulder and reduce its weight, while ensuring air flow around the shoulder and neck. With its sleek, contoured body and chic two-toned design in metallic bronze and black, the Kun Solo™ is a dynamic and affordable addition to the Kun family of shoulder rests.

A shoulder rest must fit snugly on the instrument which, during playing, sits between the chin and shoulder. These factors require both strength and flexibility. The Kun **Bravo's** bent hardwood laminates provide the only solution, and also help your instrument produce a great sound! Handcrafted in Italy from European curly maple, the **Bravo's** base is finished like the back of a fine violin, while polished brass parts add a final dash of elegance.

The result? A shoulder rest graced with startling good looks and the exceptional functionality players expect from their Kun. **Kun Bravo™: Artistry in a rest**

## EVEREST SHOULDER RESTS

Everest shoulder rests are designed in the USA and manufactured with the finest material and workmanship. Our shoulder rests were designed by a Johns Hopkins' biomedical engineer to overcome the many shortcomings of existing traditional shoulder rests. Everest Violin and Viola Shoulder Rests are the only ergonomically designed and patented collapsible shoulder rests that provide the best comfort for violin and viola players of all levels.

### FEATURES

- Specially Engineered Fixed Tilt – The unique computer-modeled design of the EVEREST shoulder rest raises the violin to an ergonomically correct and comfortable playing angle.
- Simple and Virtually Unbreakable – The one piece body integrated with adjustable leg height means that there are NO angle brackets or swivel mechanisms to break, and NO thumb knobs to misplace.
- The EVEREST Shoulder Rest is made of a strong, high grade ABS material which provides both strength and flexibility
- Improved Holding Legs and Foam – Identical and interchangeable parts for both the left and right legs.
- The holding legs are made of a soft, non-skid, wear-resistant material, with additional height requirements built right into the body of the shoulder rest.
- The foam is made from high quality, extra-thick and extra-soft neoprene for long-lasting comfort and excellent support.
- Functionality and Style – The distinctive 3D computer-modeled design of the EVEREST shoulder rest maximizes comfort without sacrificing style and elegance. Traditional areas of high stress are reinforced for long term durability.
- Engineered by Americans to American standards, this shoulder rest is built to last.

FOAM PADS

These foam pads are contoured. They fit into any case, and attach to the instrument with a rubber band. No additional weight or damage to the instrument! Violin sizes 4/4 - 1/16 available. Basic pads (firm) are a great, inexpensive way to keep students comfortable! Soft pads are more dense, and they have a tackiness that keeps them in place. **PLEASE NOTE:** both firm and soft pads are now gray. Sizes displayed are for violin.

## BELVELIN SHOULDER RESTS & PADS

The Swedish made **Belvelin Collarbone (Shoulder) Rests** are formed to facilitate a healthy posture and give full freedom of movement when playing the violin and viola. They are made of soft and supportive cellular rubber that keeps their shape and color for years. The dense rubber material makes them firm yet flexible. All three sizes can be used for all violin and viola sizes and placed anywhere on the instrument, depending on the player preference. They are attached to the instrument with one or two rubber bands. Although developed by violin teacher Eva Belvelin for her students, the rests are now used by professional players, teachers, and students of all ages.

| BEL-SR-M | Shoulder rest, medium | 17.10   |
| BEL-SR-S | Shoulder rest, small  | 15.88   |

Designed by violin teacher Eva Belvelin for her students, the **Belvelin Shoulder Pad** is an improvement over the commonly available cosmetic sponges used by many. Manufactured in Sweden out of the same advanced cellular rubber as the rest of the Belvelin line, the Shoulder Pad is firm yet flexible. It keeps its shape and color over time, and is the perfect solution for players seeking padding and grip without too much height.

**MACH ONE SHOULDER RESTS**

"Developed in 1997 the original rest is hand carved from curly maple, which beautifully matches the back of the instrument. Every maple Mach One Shoulder Rest is unique, elegant, slim and light. The sculptured shape of the Mach One Shoulder Rest molds perfectly to your shoulder. With this ergonomic design you have the option of adding the comfortable suede leather pad. The "S" shape fits comfortably on your shoulder and minimizes the size of the feet. These are molded from a single piece rubber and have a lifetime guarantee. They will never touch the ribs of your violin or viola and will not scratch your valuable instrument."

**BELVELIN BOW HANDLES**

Designed by violin teacher Eva Belvelin, these Bow Handles seek to help educators promote an ideal bow grip for their students. By “filling” the bow hand, it aids in proper finger curvature and discourages the thumb from collapsing. It is made from the same advanced cellular rubber as the rest of the Belvelin line, and is firm yet flexible.

The length of all four sizes is the same, approximately 60mm (2.36in).

The diameter of each size is:

Large – 41mm (1.61in)

Medium – 35mm (1.38in)

Small – 29mm (1.14in)

Extra-small – 24mm (.94in)

| KORG-CA2     | With a larger, easier to read display and a stylish new design, the CA-2 from KORG is the new standard in compact, handheld chromatic tuners. Suitable for a variety of instruments, this new tuner features a needle-style meter and offers up to 200 hours of battery life! Replaces the CA1.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 54.99   | 18.50     | 36.99 |
| KORG-CA50    | The CA-50 features high-precision tuning functionality and a slim and compact design. The new CA-50's display is now, even easier to read. Long considered the standard in chromatic tuners, the CA-50 offers simple and intuitive operation and a satisfying tuning experience for every instrumentalist. The calibration function supports a variety of concert pitches. It can be adjusted in 1 Hz units in the range 410–480 Hz, allowing flexible tuning that matches the song or key.                                                                                                                                                                                                                                                                                                                                                         | 59.99   | 23.37     | 39.99 |
| KORG-KDM3BK  | The KDM-3's design is similar to that of an acoustic mechanical metronome, except much smaller. It will fit nicely on a tabletop, on your piano, or in any practicing environment. Featuring a newly designed sealed speaker enclosure, it delivers powerful volume that exceeds its compact size. The START/STOP button located on top of the unit blinks in two colors, red and green, giving you a clear visual indication of the tempo. You can even start practicing with the volume set to zero. The TEMPO/CALIB dial on the top panel provides easy access to the numerical setting that you want. The content of the setting is visible at a glance in the large display. Black.                                                                                                                                                            | 129.99  | 66.00     | 89.99 |
| KORG-TM70CBK | Equipped with high-precision tuner function and metronome function. The two function can be used simultaneously. Wide detection range of C1–C8 supports a broad range of instruments. LCD needle meter with excellent sensitivity and visibility. Newly equipped with a transpose function that allows switching between in F, in Bb, and in Eb in addition to chromatic. Calibration is adjustable to match various concert pitches. Sound Out mode and SoundBack mode are great ways to train your ear. Metronome features a wide tempo range from 30 to 252 beats/minute. Choose from three types of tempo settings and 15 rhythm variations. Long battery life of up to 250 hours. Convenient memory backup function and auto power-off function. Foldable stand allows the unit to stand on its own. TM70-C includes CM400 compact microphone. | 83.99   | 54.60     | 64.99 |
| KORG-TM70TBK | Like above, without the CM400 microphone - tuner only.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 62.99   | 40.30     | 44.99 |
| KORG-CM400BK | Clip-type contact microphone using piezoelectric elements that transmits vibrations directly to the tuner by attaching the microphone to your instrument. HAMILTON STANDS

Hamilton stands have a reputation for uncompromising quality since 1883. These stands are the end result of more manufacturing experience, over a longer period of time, than any other stands made. We offer two models of folding stands, carrying bags, and two models of their new Encore line of orchestra stands.
