BULK BOW HAIR

We always have unbleached hair in bulk which is sold net by the pound. It is priced according to quality and length. This includes salt-and-pepper, gray, black, short sizes, etc. It is easy to find very inexpensive white hair that is of poor quality - this hair has been bleached, and it is typically very dry and brittle. To find inexpensive hair of good quality, you must sacrifice color. You must be willing to pay more for white hair of fine quality. Since prices change frequently, please call for latest pricing.

These incredibly well machined and strong bow tips are the latest development in violin bow tip technology. These have been developed to fill the need for a highly durable bow tip that can enter international trade because they are made of a polymer rather than a natural material. This material looks like ivory until looked at closely, wherein one plainly sees a patterned design in the material itself which clearly shows (to any customs agent) that it is not ivory.
