# CORE CUSTOMIZATION - BOWS

Imagine your name on a bow. Your bows end up in rental outfits, in school concerts, in private lesson studios, visible for all your customers and potential customers to see. With your business name, or house brand, clearly stamped on the bow you now have another advertising platform that reaches far and wide into your customer base. What a great way to help grow your business! This customization is now a reality.

Just as we can install private labels in our instruments with your business name or house brand, we can now customize bows for you at our Alabama facility:

- Silver-color looks great on both wood, fiberglass, and carbon bows.
- One time setup fee \$19.00 per plate
- Each custom laser-etched metal plate lasts for 10,000+ cycles

You can even customize the bows from the Core Bow Exchange Program!

*It's easy!  
Just send us a file of the name and/or artwork to:  
[custom@howardcore.com](mailto:custom@howardcore.com)*

## J.THIBOUVILLE-LAMY BOWS Our History

The founding of J. Thibouville-Lamy (J.T.L) dates to 1861 in Mirecourt, France, where it was one of the biggest musical instrument manufacturers of its day, at its peak producing 150,000 instruments annually, employing 1000 craftsmen.

JTL continued to build instruments and bows in Mirecourt until the late 1960s. After this time, the trading company continued, but this time based in the United Kingdom where until its liquidation in 2017, it operated primarily as a distribution company selling other manufacturer's instruments, parts and accessories.

In 2019, the British musical instrument distributor and manufacturer, Barnes & Mullins - itself founded in 1895 - purchased the rights to J.Thibouville-Lamy and the remainder of the company's historical artefacts.

It was with great joy that another such historically significant orchestral brand was welcomed into the B&M family. As the owners of The Hidersine Company and long-time collaborators with W.E.Hill & Sons, Barnes & Mullins are delighted to be working with some of the very finest bowmakers and luthiers in Suzhou, China in the creation of a J.Thibouville-Lamy legacy for the 21st century.

Barnes & Mullins are honoured to be the proud custodians of a large number of original bow stamps dating back perhaps over a century and historically used by countless French master archetier.

Having passed through the rich tapestry of J. Thibouville-Lamy's history and used throughout many of its finest French ateliers, each bow in the current range is hand-stamped using these revered artifacts – meaning the spirit and legacy of J. Thibouville-Lamy continues to live on today at the fingertips of every player.

**Handmade by Master Archetiers**

J. Thibouville-Lamy ‘Master Archetier’ bows honour the expertise of the Mirecourt bow-makers of the 19th and 20th centuries with each bow blank selected from a coveted stock of the finest 20 year seasoned Pernambuco.

Each blank is first tested for resonance and elasticity using a Lucchi Meter, with only blanks achieving a rating above 5300 making the necessary grade. This grading process ensures that only the very finest sticks are selected for the very finest bows.

Bow frogs are cut from fine Burmese Ebony and hand-finished with ‘925’ sterling silver fittings; the grips are made of the softest leather and wound with ‘925’ Silver wire; and the bow hair is unbleached, Mongolian horsetail, prized for its thickness and strength.

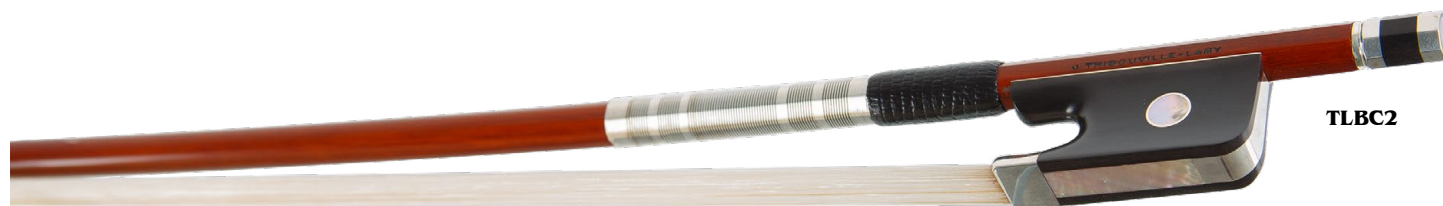

Each bow includes presentation box and Certificate of Authenticity.

## WHAT YOU NEED TO KNOW ABOUT GLASSER BOWS

**THIS IS A FACT: ALL GLASSER BOWS ARE RE-DESIGNED AND REPRESENT THE VERY FINEST IN SYNTHETIC BOWS AVAILABLE IN THE WORLD! Here are a few more facts:**

- All Glasser bows have a limited lifetime warranty! What other bows make that claim? None!
- Utilizing new molding technology, Glasser bows have improved flexibility and balance point on all models.
- Ebony frogs are made in Germany by Helmut Paulus, the finest bow part manufacturer in the world.
- Except for the ebony frogs, these are all MADE IN NORTH AMERICA. This helps us all!

**There are many synthetic bowmakers in the world. We believe there is only one who makes the best available models. That is why we sell Glasser bows. You can buy these with the highest degree of confidence! Don't be misled by slightly lower priced imported bows - Glasser means quality and true value!!**

**GLASSER "X" SERIES**

Patented advances in carbon graphite molding technology have enabled Glasser Bows to make a new graphite bow at a much lower price. The half-lined Paulus, German-made ebony frogs have faux pearl eyes and slides, which are colored to match colored sticks and hair, if desired. Available in all sizes (fractional sizes by special order). These are truly remarkable bows, especially at these prices! **Standard colors are brown or satin black with white hair.** Add \$28.00 List for premium colored bows. Available in all sizes (fractional sizes by special order).

Stick colors with matching hair, frog slides and eyes: red, green, blue, white and purple. Other colors may be available - please ask.

GLASSER BOWS

**GLASSER CARBON GRAPHITE BOWS**

These carbon graphite bows are Glasser's finest graphite sticks, and feature the highest quality ebony frogs by Paulus. Frogs are nickel silver-mounted with the finest flamed abalone slide and eye. All are fully-lined with a double eye (except German Bass frog is half-lined with double eye). Standard model is high-gloss black with premium stallion white unbleached horsehair. Premium options include colored sticks, colored hair, and multiple colored hair! These carbon graphite bows may also be custom ordered with regard to weight, balance, and stiffness. Available in all sizes (fractional sizes by special order)

Stick colors: brown, red, green, blue, purple, white, metallic silver, metallic gold

Hair colors: red, green, blue, purple, yellow, black (mix any two or three of these colors for multiple colored hair!)

**GLASSER BRAIDED CARBON FIBER BOWS**

These superlative models represent the latest in bow technology! Unlike standard composite bows, which are hollow, these bows have a solid core to give them a supplementary even feel and balance. The carbon fibers used to make this bow are woven into a continuous pattern. This creates a seamless bow that carries its fiber patterns down its entire length just as the grain of a wood bow is carried down its entire length.

Glasser uses a natural finish, rather than paint, to showcase the aesthetic beauty of this bow's interwoven design. The bows feature deluxe ebony Paulus frogs made in Germany. The frogs are nickel, silver and gold-mounted and have the highest quality goldfish abalone pearl slide and large eye. Please look at this bow carefully! Note the new finish, the finely shaped head, the German silver tip, the German ebony frog, the strength and the balance. These patented braided carbon fiber bows are the ideal choice for expert players!

Cello: Item # HOFB-8-4-VC List \$ 842.00

For nearly 130 years, Höfner of Germany has been producing quality string instruments. Karl Höfner started the company in 1887 in Schanbach, which was the European center of its day for musical instrument production. Over the coming decades, Höfner's business grew to meet global demands, earning a reputation for high-quality craftsmanship and economically-efficient working methods. Now located at Hagenau in Bavaria, Höfner uses the traditional methods of bowmaking, tried and true for generations, to create a wide range of bows suitable for students as well as professionals.

*Knoll Bows was founded in 1932 by Alfred Knoll (1909 - 1980). His son Hartmut Knoll (born in 1937), took over the firm in 1977. Alfred's grandson Gerald Knoll (born in 1968) took over the workshop in 2003. The company has now spanned three generations of the Knoll family as they continue the fine tradition of bowmaking in Regnitzlosau, Germany. A careful selection of woods, which have been stored for many years, as well as precise craftsmanship, exclusively performed by well trained specialists, are the most important foundations of Knoll's work.*

GERALD KNOLL ARTIST BOWS

Gerald Knoll is regarded as one of the finest bowmakers in Germany today. Having grown up in the “business” (son of Hartmut Knoll, grandson of Alfred Knoll) he studied both violin making & bowmaking, taking diplomas in both areas. His primary love is bowmaking, so he also did an apprenticeship with Hans Karl Schmidt in Dresden, regarded by many as the finest bowmaker in Germany. Knoll’s work is winning many awards, & we are very proud to be his distributor here in the U.S.

The Seifert bow workshop was founded in 1932 by Oskar Seifert. Now in the second and third generations, Lothar Seifert and his sons are leading their workshop, making bows in small quantities by hand. Only using wood that has dried in their shop for at least 20 years, the resulting bows offer professional-level characteristics. Seifert bows have been played, appreciated, and collected by serious musicians for decades.

**GRÜNKE & SÖHNE PERNAMBUCO BOWS - MADE IN GERMANY**

# CORE CASES

**BOW CASES - BLACK VINYL EXTERIOR**

Bobelock bow cases fit violin, viola, cello and bass bows comfortably. Bass bow cases are lined with wine or blue velour (green available in single violin size) and surrounded by a sturdy plywood shell. The covering on our bow cases is a tough pebble-grain vinyl that lasts for years. The violin/viola/cello bow cases easily fit all three sizes of bow and are designed to keep them from sliding around inside; very important for those delicate tips! Sturdy clasps keep the case closed even if dropped.

Interior Colors - Velour/Velvet\*: blue, wine, green. (Green interior available single bow case only.)

*\* Single bow case has velvet interior; all others are velour interior.*

## ARTINO RETRO SERIES

Carbon fiber stick with subtle, refined antique dark brown varnish. Fully lined ebony frog with eye, and three-part button. Medium and supportive stick construction, traditional and elegant chamfer, nicely and consistently balanced. The balance points and weights are calibrated during the manufacturing, sorting, and setup process to ensure the consistency and playing characters respectively. These new bows not only look like, but play like, very good old bows! Nickel silver winding, genuine leather grip, large single eye full lined frog, 3 part ebony & nickel silver screw.

Item #	description	\$-list	MAP
AB461RVN-1	Violin, 4/4.	341.00	221.65
AB461RVA-1	Viola, 4/4.	394.00	256.10
AB461RVC-1	Cello, 4/4.	476.00	309.40

## ARTINO ARIA SERIES

Carbon fiber charcoal-gray stick. Fully lined ebony frog, and solid button with eye. New uni-directional carbon fiber technology gives this bow great flexibility and quick response for various bowing techniques. Fantastic balance makes this bow an extension of your arm. The balance points and weights are calibrated during the manufacturing, sorting, and setup process to ensure the consistency and playing characters respectively. Unique and stylish appearance. Nickel silver winding, genuine leather grip, high quality fully-lined frog, one part nickel silver screw.
