PURCHASING BULK STRINGS

All Bulk strings have been removed from the packaged strings listings. Bulk strings that are available for purchase are listed on pages D-2 through D-9.

In order to help keep your prices as low as possible, Bulk strings must be purchased in pre-pack quantities. We will no longer offer Bulk sets.

Bulk STRING PURCHASE QUANTITIES:

Violin and Viola - packed coiled in bags or straight and in tubes of a dozen* each individual strings.
- no Bulk sets

Cello and Bass - coiled in plastic bags of five* each individual strings.
- no Bulk sets.

**unless otherwise indicated*

BULK STRINGS MUST BE PURCHASED IN THESE QUANTITIES TO RECEIVE BULK DISCOUNT!
SMALLER OR UNEVEN QUANTITIES MUST BE PURCHASED PACKAGED.

Pirastro Oliv and Eudoxa "straight" (Rigid) gut and Gold Label gut strings are sold as individual strings, and are **NOT** sold at Bulk discount.

Kaplan Violin strings offer professional-level players an unprecedented combination of beauty and power in two options, Kaplan Amo and Kaplan Vivo. Kaplan Amo provides warmth, richness, and flexibility for brighter instruments, while Kaplan Vivo delivers brilliance, clarity, and a robust feel for darker instruments. Both sets settle quickly, exhibiting a rich tonal color palette and superb bow response.

Kaplan Viola strings offer professional-level players a full range of options designed to meet their exacting needs: two synthetic core sets, Kaplan Amo and Kaplan Vivo, and our existing stranded-steel core set, renamed Kaplan Forza. Kaplan Amo provides warmth, richness, and flexibility for brighter instruments, while Kaplan Vivo delivers brilliance, clarity, and a robust feel for darker instruments. Both sets settle quickly, exhibiting a rich tonal color palette and superb bow response. Kaplan Forza, the stranded-steel core set, provides an even higher level of clarity and tonal focus, and quicker bow response and settling time.

Kaplan Cello strings produce a rich and complex tone. Conceived for the most discerning musicians, they stand up well to extreme bow pressure, allow a diverse tonal palette, and provide a powerful but warm sound.

Kaplan Solo Bass

Designed for A-E-B-F# tuning, the Kaplan Solo Bass set delivers the exceptional bow response and tonal balance of the Kaplan Orchestral set, along with the additional projection and clarity needed for soloistic playing. The strings are balanced across the set, allowing players to achieve precise articulation and clarity without sacrificing volume or beauty of tone. 3/4, Medium only.

| HELH610 | Complete hybrid set - coiled | 361.94 | 179.99 |

Helicore Orchestral bass strings are multi-stranded steel core strings that produce a warm tone quality with excellent bow response. The core design makes for strings that are very easy to play under the left hand. Damping is optimized for arco use, but they also work well for pizzicato applications where a very warm, less-sustaining sound is desired. Scaled to fit 3/4 size bass with a playing length of 41 3/4 inches (1060mm), these medium tension strings are optimized for a majority of players.

Helicore Solo bass strings are tension-adjusted specifically for A-E-B-F# scordatura solo tuning, one whole-step higher than standard tuning. They are multi-stranded steel core strings that produce a warm tone quality with excellent bow response. The core design makes for strings that are very easy to play under the left hand. Damping is optimized for arco use, making them ideal for solo performance.

Helicore Pizzicato bass strings are multi-stranded steel core strings that produce a brighter tone quality than the rest of the Helicore bass line. The core design makes for strings that are very easy to play under the left hand. Damping is reduced to create maximum sustain and "growl".

Helicore Hybrid bass strings are multi-stranded steel core strings that produce a moderately warm tone quality. The core design makes for strings that are very easy to play under the left hand. Damping is optimized to create a good balance between pizzicato sustain and bow response, allowing for good performance across many playing styles, from symphonic to jazz or bluegrass.

Prelude strings are manufactured using a solid steel core.

Unaffected by temperature and humidity changes, they have excellent bow response. Prelude strings have the warmest sound available in an affordable, solid steel core string design. Prelude is the educator's preferred choice for student strings due to their unique blend of warm tone, durability, and value.

See pages D2-D3 for listings.

D'ADDARIO STRING CORE MATERIALS**What type of core do I want?**

In general, steel core strings have a clear, focused sound, while synthetic and gut core strings have a more complex sound. The optimal string depends on your instrument, the type of music you play, and your own playing and bowing style. Different strings have different sound and playing characteristics.

Solid and Stranded Steel Core

Steel core strings can be made with smaller diameters which improve bowing response. When combined with D'Addario's dampening technology, these strings can be played with very quick and easy bow response. The flexibility of stranded steel cores adds greater sound complexity and further improves bowing response, especially for the lower strings.

Synthetic Core

Existing as strands of fibers, synthetic cores are constructed from man-made substances, such as nylon or other high-tech materials. Synthetic core strings are designed to mimic the complexities of gut strings, while remaining relatively more resistant to corrosion and climate change. They can produce a wide range of tonal color and volume.

Gut Core

Gut strings are made out of the processed intestines of sheep or cows. While gut strings are the earliest form of bowed string, they are still used today, often in conjunction with earlier or historic instruments. Because it is an organic material, gut strings produce a very warm, complex sound, but have a shorter lifespan and are less resistant to climate changes than steel or synthetic core strings.

Zyex Violin

Zyex synthetic core strings produce an extremely warm, rich sound. Zyex strings are made from a new generation of synthetic material, creating strings that are incredibly stable under drastic climatic conditions. Within a matter of hours, Zyex settles in on the instrument with a sound that is warmer than most other synthetic core strings. Zyex is also an excellent choice for use on bright sounding instruments.

Zyex violin - scaled to fit 4/4 size violin with a playing length of 13 inches (328mm), these medium tension strings will allow for greater projection and volume potential. The D string included with the ZYEX310A set is aluminum wound, and the D string included with the ZYEX310S set is silver wound. Packaging in uniquely-designed sealed pouches provides unparalleled protection from the elements that cause corrosion.

Zyex viola - optimized to the needs of a majority of players. Packaged in uniquely-designed sealed pouches providing unparalleled protection from the elements that cause corrosion. Zyex synthetic core produces a rich, warm tone. Short break-in time and excellent bow response provides superb playability and a broad tonal palette.

Settling in on the instrument within a matter of hours, **Zyex bass** strings provide rich, gut-like, complex tone, combined with power and clarity for both pizzicato and bowing. Zyex bass strings were developed primarily to offer outstanding pizzicato attacks and sustain, as well as superb bowing response. Get the sound and feel of gut strings with more evenness, projection and stability than real gut.

Jargar Superior Viola

"In this current age where the demand of power to project sound from stage to audience is bigger than ever, you now have a new string solution – Viola Superior. The set gives you extra range to sink in without breaking the sound. It gives you the possibility to hear yourself even while playing soft. The sound is clear, concentrated and strong, and the pitch is easy to detect under the orchestra playing which makes it easier to adjust. The set offers a palette of sound. You have the flexibility of a synthetic core string, as well as the warmth and sweetness of gut strings. The strings are balanced top to bottom, on large and small violas. The set feels soft and easy for the left hand. The strings have a quick response and good left hand playability. It is very easy to mold the sound from the smallest PPP to a full blown FFF. All in all, you get a perfect set for orchestra, chamber music and solo playing."

| Item # | Description | \$ - List |
|--------------|------------------------------|-----------|
| JAR21B-SU | Jargar Viola A Ball Superior | 99.40 |
| JAR22-SU | Jargar Viola D Superior | 110.92 |
| JAR23-SU | Jargar Viola G Superior | 117.80 |
| JAR24-SU | Jargar Viola C Superior | 130.60 |
| JAR20-SET-SU | Jargar Viola Set Superior | 458.72 |

The **Special** strings are built on the long tradition of the Classic A and D strings but they are more powerful than the Classic A string and D string. The secret is in the bigger thickness of the strings which give them more power, volume and brilliance and make them the perfect choice for solo playing, chamber music as well as orchestra playing.

The **Superior** set sounds warm, round and powerful from the first second after winding up the strings. They are very well balanced and rich in overtones. They both support full forte and deep piano colors and they are very projective and responsive. Superior strings are perfect for chamber music, orchestral playing and solos. The strings are very long-lasting which make them one of the best price-performance ratio in the market.

Jargar Evoke Violin

The Evoke by Jargar Strings brings out the essence of the Jargar sound with a new freshness and power. The Evoke set exhibits a powerful projection with a brilliant sound colour, a high modulation capacity, and a broad sound component. The sound texture is simultaneously fine and dense, which allows for articulation with ease and precision. Add to this a very fast and direct bow response, and you have a set that powers presence.

**Larsen Original Violin Strings**

Larsen Originals deliver a warm yet direct and unhesitating feel with rapidly achieved tuning stability and consistency of sound. Original, reliable, robust projection, ideal for the neutral sounding instrument in need of some complementary warmth.

Available in soft, medium and strong tension. The Larsen Original are supplied with an additional E Gold string, which is especially suitable for darker instruments in need of a powerful yet sensual resonance. The Larsen E-Gold string can also be advantageously combined with Larsen Virtuoso® A, D and G strong tension strings.

String Details:

The Larsen E string is made of carbon steel while the E Gold string is made of gold-plated stainless steel. The A, D and G strings are made using a multi-filament nylon core. The A string is wound with precision rolled aluminum flat wire and the D and G strings with pure silver.

**Larsen Original Viola Strings**

Our Larsen Viola A has very nearly become the default choice for the ideal viola set up. Offering versatility and projection combined with long lasting and consistent performance.

Medium lends a lovely mellow sound, while strong offers brightness and power. Larsen Original for viola C, G and D strings are recommended in particular for bright sounding instruments.

All four strings are offered in two tensions, medium and strong, the A string is also available in soft. The strong tension strings offer more volume and higher resistance to the bow.

String Details:

Our Viola A string is made on a solid steel core. It is wound with precision rolled stainless steel flat wire. The C, G and D strings are made with a unique multi-filament nylon core. We use windings of precision rolled silver flat wire for the C and G strings, and aluminum for the D string.

Larsen Cello 4/4

Larsen Original Cello Strings

The famously distinct and embracing warmth of the Original Larsen sound. Ideal for the classical cello repertoire combining pronounced projection, easy response and rapid tuning stability our original steel core string continues to define a benchmark for cello.

At Larsen Strings we make every effort to ensure that our strings are of the highest quality with the consistently unique Larsen sound. All four strings are offered in tensions soft, medium and strong.

String Details:

Our A and D strings are wound with a special precision rolled stainless steel flat wire. Meanwhile, the G and C strings are wound with tungsten, providing a deep, warm and focused sound with great power and personality. Our solid steel core Cello range is completed by an E string. This string is wound using precision rolled aluminum.

Larsen Fractional Cello Strings

Keeping all things in proportion: Our aim was to offer Larsen cello for smaller instruments without compromising the Original Larsen sound. Our fractionals are purpose designed, perfectly proportioned versions of our full size Originals.

For the first time ever, this set of strings enables uncompromised power and sound quality similar to that of full sized quality instruments.

String Details:

The same high grade steel cores wound for A and D in stainless steel flat wire, while G and C are based on a concentric multi-stranded steel core wound with high grade tungsten. All supplied bespoke for 3/4, 1/2, 1/4, and 1/8 size cello.

Larsen Soloist's Edition Cello Strings

Complementing the Original range and purpose designed for enhanced projection, focus and volume particularly at the higher harmonics as demanded by the professional solo player.

The SOLOIST EDITION strings are based on solid steel cores, different in properties and dimensions from their regular counterparts.

Our Soloist Edition is offered in all three tensions for A, D and G optimized slightly above the Original equivalents.

String Details:

The A and D strings are wound with precision rolled stainless steel flat wire, the G string with Tungsten – made for the demanding soloist player.

Crown By Larsen Cello Strings

Your first step on the Larsen journey begins with Crown for cello. Providing a comfortably affordable entry point into our range yet without any compromise in the Larsen seal of quality and consistency.

A smoothly brilliant sound without metallic overtones. The entire range offers an impressive string response and playing characteristic.

Larsen Aurora® Violin Strings

Aurora violin is a string for all ages from the youngest student starting at the very beginning to the seasoned professional looking for a new, higher quality, reference standard for violin strings. Offered in full size medium and strong and medium fractional sizes from 3/4 to 1/16, Aurora violin opens the opportunity for all to learn, develop and perform with professional grade strings at an accessible price.

String Details:

The E features a unique bespoke developed carbon steel core whilst the A is aluminum wound on a synthetic core. The D is available as either double wound aluminum or as D Silver which is wound with layer of aluminum and one of high-grade silver. The G is wound with the same high grade silver which is of an even finer quality than sterling silver.

Aurora Fractional: purpose designed, perfectly proportioned versions of our full size Aurora offering quality strings for smaller instruments. Note: the fractional E in 1/8 and 1/16 sizes is wound with aluminum to assist with ease of playing.

Larsen Aurora® Cello Strings

Your first step on the Larsen journey begins with Aurora Strings for cello. Providing a comfortably affordable entry point into our range yet without any compromise in the Larsen seal of quality and consistency. A smoothly brilliant sound without metallic overtones. Aurora represent great value without compromise.

String Details:

All four strings have a solid steel core. The A and D strings are wound with a corrosion resistant alloy, the G string with nickel, and finally the C string is made using tungsten. The entire range offers an impressive string response and playing characteristic. In developing these strings, we have remained true to our values of high quality and consistency and manufactured a product of extraordinary value at a highly affordable price. Aurora Fractional: purpose designed, perfectly proportioned versions of our full size Aurora offering quality strings for smaller instruments.

Larsen Tzigane® Violin Strings

Directly inspired by Ravel's Tzigane and so delivering a smooth, richly saturated sound with an overlay of sensual warmth. Rapidly played in and eminently playable with excellent focus and projection. A mellow accompaniment for the brighter to neutral sounding instrument.

The strings are offered in three tensions, soft, medium and strong. The strong tension strings offer the most volume and resistance to the bow. For very bright sounding violins, Tzigane® strong tension is the ideal choice.

String Details:

The Tzigane® G, D and A strings are made using a multifilament nylon core. The G and D strings are wound with precision rolled pure silver flat wire, the A string with aluminum. The E string is made of a unique carbon steel.

Virtuoso Violin

4/4 Only - Medium and Strong.

| Item # | Description | \$ - List |
|----------|---|-----------|
| VIR11-1B | Virtuoso Violin removable ball/loop end E, Carbon Steel | 23.06 |

| VIR13-1 | Virtuoso Violin D, Synthetic Core, Pure Silver Wound | 69.79 |
| VIR14-1 | Virtuoso Violin G, Synthetic Core, Pure Silver Wound | 71.29 |
| VIR10-1B | Virtuoso Violin Set With removable ball/loop end E | 229.13 |

Larsen Virtuoso® Violin Strings

A truly innovative synthetic string at only moderate tension yet capable of delivering a richly nuanced sound with exceptional volume. Extremely well received and consistently reviewed as setting a new standard for the violin.

Eminently playable and noted for its remarkable string response and reliability, the Larsen Virtuoso® suits warm to neutral sounding instruments. Given their moderate tension, they lend particular benefit to older instruments.

We offer Larsen Virtuoso® strings in two tensions, medium and strong. Virtuoso® medium and strong are both somewhat lower in tension than their conventional equivalent gauges. The medium tension strings show extraordinary string response, playability and sound modulation capability. The strong version is more focused in sound, with higher resistance to the bow.

String Details:

The Virtuoso® E string is made using a unique carbon steel, while the A, D and G strings build on a new, pioneering synthetic multi-filament core. The A string is wound with precision rolled aluminum flat wire, the D and G strings with pure silver.

Virtuoso Viola

Available Medium and Medium XL

| Item # | Description | \$ - List |

| VIR24 | Virtuoso Viola C Medium | 167.67 |

Larsen Virtuoso® Viola Strings

Since its original launch back in 1995, our Original A has become almost the default choice for violists. Offering excellent projection with a broad spectrum of sound colours combined with a long lasting and consistent performance. With the development of our new Virtuoso Viola strings the focus has been upon creating a new offering for viola D, G and C, built upon the firm foundations of our tried and trusted A.

String Details:

The Original Viola A string is based upon a solid steel core, wound with precision rolled stainless steel flat wire.

The Virtuoso Viola D, G and C strings build upon a synthetic multi-filament core and are wound with pure silver.

Now Also Available in a Longer Scale. Virtuoso Medium Viola in D, G and C are now offered in a longer scale for larger instruments with a longer free vibrating length. Our Original Viola A already accommodates the longer scale.

The **Soloist** is more focused and brings greater volume to the instrument.

Il Cannone Violin Strings

New for violin, our Il Cannone celebrates Paganini's legacy with what we believe to be a truly revolutionary sound.

Il Cannone A Options

During the development phase of Il Cannone violin with musicians we identified two trends in terms of player response. One group of violinists preferred the directness and focus of a set using one prototype A whilst the other group chose the warmer and broader feel of an alternative A variant.

Warm & Broad or Direct & Focused? We have completed an extensive trial testing Il Cannone A options. We listened to your feedback & are pleased to announce that the Il Cannone Warm & Broad A is now available as a permanent option. See some of the musicians who participated in the testing process below. All images submitted by the participants.

String Details:

The Il Cannone E string, now available with a dedicated loop option, is made using a unique carbon steel, while the A, D and G strings build on a new, synthetic multi-filament core. The A string is wound with precision rolled aluminum flat wire and the D and G strings are wound with pure silver.

Il Cannone Gold Violin

New Il Cannone Gold for violin: created with high-grade gold for the soloist violinist looking for unique power and durability.

Il Cannone Cello Strings

The new Larsen Strings Il Cannone cello range has been hailed as a step change in cello string development. Available in two variants, Direct & Focused and Warm & Broad, all eight strings are mutually compatible and fully interchangeable. By design. Il Cannone for cello gives you a toolbox of options to choose from to optimise your individual sound.

Direct & Focused or Warm & Broad?

The core sound can be blended with any Il Cannone string combination(s) because all of the options are of a similar moderate tension and engineered to complement one another. For example, combine the Warm & Broad C with the Direct & Focused G and you will notice that C becomes more focused and the G becomes warmer.

Cello also available in SOLO.

Larsen Magnacore® Cello Strings

ACHIEVE THE FULL POTENTIAL OF YOUR CELLO!

The Perfected Set: Extremely well balanced set for the professional cellist offering a charismatic sound with an endless palette of colours.

"With the Magnacore® A and D, we have added a lovely edge to the sound, nice & bright so it carries but still with the famous Larsen roundness. These strings offer many sound colours, from bright to dark, combined with a new clarity and brilliance - a truly singing sound." - Laurits Th. Larsen

Our Larsen Magnacore® G and C strings have an incredibly warm and focused sound. They offer a wealth of overtones, tremendous volume and exceptional string response – even when played in pianissimo. The playing-in time has been reduced to an absolute minimum, delivering outstanding string performance instantly.

The Magnacore® medium set offers a wonderfully sonorous and broad sound with unique ease of playability. It is ideal for cellos with a neutral to bright timbre. Compared to the medium tension set, the strong version is even more powerful, focused and direct in sound. We can recommend the Magnacore® strong for all celli – but in particular for the darker and deeper sounding instruments.

Larsen Magnacore® Arioso for Cello

New to the Magnacore® menu: The Arioso G and C with a gentle tension. Experience a new freedom of expression without a compromise in power. Well suited to both older Italian as well as modern instruments. For the gourmet musician experimenting with new combinations of sound texture and colour.

Free your Voice: Created to Sing with a Subtle Power

The Magnacore® Arioso C and G deliver a lower tension without compromising sound volume. Liberating and accentuating the A and D in your over-all sound and providing easy response and effortless playing to the lower register. The Arioso C and G partnership offers new possibilities to find your voice with your particular instrument combined with your ideal match from the full menu of Larsen A and D for cello: Original, Soloist and specifically Magnacore® in medium or strong tension.

The Magnacore® Arioso G and C strings are made on a concentric multi-stranded steel core and wound with high-grade tungsten and precision rolled flat wire.

Magnacore® Cello

4/4 Only - Medium and Strong

The Magnacore® A and D are made on a solid steel core and wound with high quality precision rolled flat wire. Magnacore® G and C strings are made on a concentric multi-stranded steel core and wound with high grade tungsten and precision rolled flat wire.

Pirastro - Handmade in Germany

As a result of the quality of both their strings and rosin, Pirastro has become a byword for a sound which is both beautiful and reliable. As a result, a great number of classical string musicians recommend Pirastro strings; their tonal flexibility and expressive power allow each musician to create their own unique sound and to show their own instruments to their very best advantage. The tonal flexibility and the expressive power of each single Pirastro string create an unsurpassed choice for the musician across the Pirastro range. Musicians can choose from the complete range of gut strings (e.g. Passione and Oliv), from synthetic strings (such as Evah Pirazzi or Tonica) or steel strings (e.g. Flexocor and Chromcor). Finally, Pirastro rosins are designed specifically for Pirastro strings and this combination is responsible, in no small part, for the excellent world-renowned Pirastro sound.

* INDICATES STRING IS PART OF STANDARD SET

CHROMCOR PLUS FEATURES:

- Chromcor Plus strings have a single filament steel core, wound with chrome steel.
- Overall the set sounds slightly darker than Chromcor.
- The A- and D-strings have a slightly bright sound.
- The G- and C-strings create a warm sound and have a short decay.
- very easy response
- exceptional tuning stability and immediate playability

HARDANGER FIDDLE

Made especially for this traditional Norwegian string instrument, Hardanger Fiddle strings incorporate the modern techniques Pirastro has developed for crafting traditional gut strings at a consistent and high quality. Four of the strings are traditional violin tuning; additional four resonance strings vibrate sympathetically.

Eudoxa rosin recommended for best results with Hardanger Fiddle strings.

No. 1 Universal

- wound steel E-string
- warm, sweet and brilliant sound
- outstanding response
- no whistling of the open E-string

4/4 Only

| Item # | Description | \$ - List | \$ MAP |

| NO1311531 | No.1 Universal Violin E Loop Stark | 35.64 | 15.23 |

NO.1 UNIVERSAL FEATURES:

- The No.1 E-string has a coated carbon steel core material with a high-tensile strength and is wound with a very thin chrome steel flat-wire
- warm, sweet and brilliant sound
- outstanding response
- no whistling of the open E-string
- As the No.1 E-string is wound with chrome steel, it is long-lasting. Chrome steel cannot corrode and is not affected by hand perspiration
- The No.1 E-string has been specifically designed to be "Universal" and can be matched with any A, D, G set

Eudoxa

The traditional gut core string

- finely wound and polished, handmade gut strings
- warm, complex and rounded sound
- low string tension

EUDOKA FEATURES:

- The sheep gut core of our Eudoxa strings is manufactured, wound and polished in the traditional way, by hand
- well-balanced warm tone with a great diversity of sounds
- low string tension and a comfortable left hand feeling
- ideal for orchestra, chamber music and recording studios
- Altering the gauge by 1/4 PM changes the tension by 3%

EVAH PIRAZZI FEATURES:

- Evah Pirazzi strings have a core made from a modern synthetic multifilament fibre
- very intensive and powerful, excellent for Soloists
- outstanding playability and exceptional response at any of the dynamic levels
- complex sound, rich with overtones based on a brilliant core sound
- Evah Pirazzi strings translate every minute impulse from bow and fingers into beautiful sounds
- expressive, great nuances; enormous dynamic range
- outstanding tuning stability; enormous projection
- absolutely insensitive to variations in temperature and humidity
- suitable also for electric or electrically-amplified violins

Evah Pirazzi - VIOLIN PLATINUM E

This new Platinum-E provides the violinist with an immense abundance of sound colors, an overtone-rich radiance to its large warm core tone, and a wide sound projection. The surface of the platinum coating provides the pleasant feeling of stability under the fingers of the left hand, which greatly benefits changes in position and vibrato. The new Pirastro Platinum E-string features a newly designed loop end, which allows easy removal of the ball by hand – without tools – allowing the player to use both types of fine-tuners.

Pirastro Cello rosin recommended for best results with Evah Pirazzi cello strings.

* INDICATES STRING IS PART OF STANDARD SET

Oliv Evah Rosin

Dark olive color. Relatively soft, low dust forming, big sound, good grip with low noise. Well suited for gut strings and Evah Pirazzi strings.

EVAH PIRAZZI BASS FEATURES:

- Evah Pirazzi strings have a core made from a modern synthetic multifilament fibre which is wound with chrome steel.
- The all-round string set: suitable arco and pizz alike.
- The sound is big, powerful, dark and well-rounded.
- emphasized lower frequencies and outstanding resonant decay
- exceptional projection
- high torsional stiffness
- short playing-in-time
- very quick response and comfortable left-hand feeling
- completely insensitive to changes in temperature and humidity
- Gauge "weich": Compared to the medium orchestra set the sound of the "weich" strings is brighter and growlier with a little more sustain. The set has a pronounced core sound. Due to the reduced string tension the playability is easier than with the standard set.

EVAH PIRAZZI GOLD FEATURES:

- Evah Pirazzi Gold strings have a core made from a modern synthetic multifilament fibre
- brilliant, golden tone; wide range of sound colors
- full-bodied and big sound from the very bottom to the top of the register
- The great dynamic range allows skilled players to explore confidently both the finest nuances of quiet passages and create powerful sonorities when playing close to the finger-board or using a strong bow arm
- instant response throughout the complete dynamic range
- very short break-in time; excellent tuning stability
- absolutely insensitive to variations in temperature and humidity
- Gold violin G-string: This G-string is wound with a pure gold wire. It offers a round and full tone
- Silver violin G-string: very dynamic sound which emphasizes a more brilliant tone
- NEW Stainless Steel violin E-string: It has an excellent response and generates a refined and smooth sound right to the very top of the register

* INDICATES STRING IS PART OF STANDARD SET

EVAH SLAP BASS FEATURES:

- The Evah Pirazzi Slap set is a unique blend of modern and traditional core materials, combining a plain gut
- G and D with a synthetic core chrome steel wound A and E.
- The tone is dark and rich with great projection which is ideal for slap style but also great for old-school pizzicato and baroque arco styles.
- The tension is low and even across the entire fingerboard.
- The plain gut G and D of the Evah Pirazzi Slap set are made of sheep gut using new techniques which allow for reduced playing-in-time and increased tuning stability without losing the beauty of the gut sound.
- The core material of the A and E consists of a new synthetic material that we have co-developed with our supplier and which we obtain exclusively.
- This new core material offers an unmatched wide range of sounds, is absolutely insensitive to temperature and humidity changes, and offers the musician an unparalleled dynamic range.
- The A and E strings are then precision wound with a finely polished chrome steel flat wire.
- The design of each individual string has been carefully matched to one another allowing for effortlessly smooth transitions from string to string without any tonal break between the plain gut D and synthetic A.
- Also available as a complete modern synthetic core set: Providing the same warm and round sound, low string tension, very easy playability with exceptional tuning stability, all at a very attractive price!

Evah Pirazzi Gold Rosin

For our new string set Evah Pirazzi Gold, characterized by its seductive and inspiring sound, we have developed a perfectly matching rosin. It brings to the fore the full sound spectrum, powerful projection and excellent bow response of these strings.

Evah Pirazzi Gold rosin increases the ease of response in the softer dynamic range and maximizes the ability of the instrument to react to bow impulses during fast, virtuosic playing. It allows powerful contact with the strings, draws out the sound evenly and enables clear articulation without harshness. Even right after the rosin has been applied, the bow will afford the player a smooth, supple and satisfying playing experience.

The Evah Pirazzi Gold rosin distinguishes itself by a very minor formation of dust with no residues forming on the bow hair and the strike point of the string.

To achieve optimal results with this rosin, we advise you to apply it sparingly. You may find that you need less than with other rosin types.

Evah Pirazzi Neo

The new violin string set Evah Pirazzi Neo was designed in close collaboration and with the wonderful support of concert soloist Janine Jansen, resulting in a string set that offers great power and volume in its low frequencies, brilliance and focus across the entire sound spectrum and an inspiringly simple and direct response.

FLEXOCOR DELUXE BASS FEATURES:

- The core material is a high-tensile rope made from carbon steel which offers great flexibility. All strings are wound with chrome steel.
- suitable for solo passages of orchestral performance, classical orchestral repertoire and pizzicato passages
- A string which likes to be challenged to translate every minute impulse from bow or finger into brilliantly clear or voluminously dark sounds with lightning speed.
- Great wealth of tone colors: a brilliant and bright or a dark and big sound - everything is possible.
- full resonance and unmatched projection
- outstandingly easy playability at all dynamic levels
- Intonation: the strings offer the performer a perfect sense of control and security at all times.
- immediately playable and outstanding stability
- instantaneous response

* INDICATES STRING IS PART OF STANDARD SET

ORIGINAL FLEXOCOR BASS FEATURES:

- The core material is a high-tensile rope made from carbon steel which is wound with chrome steel.
- This is an outstanding set for arco, which can withstand a powerful and heavy bowing arm.
- brilliant sound with a short sustain
- powerful sound with great projection
- big tone volume
- instantly playable and absolutely stable
- very quick response, which is slightly quicker than Original Flat-Chrome

The Jazzer Bass

- rope core steel strings
- modern Jazz string
- very bright and powerful sound
- long sustain

3/4 Only

FLEXOCOR PERMANENT CELLO FEATURES:

- The A-string has a core made from a single filament of high-tensile steel and is wound with chrome steel. The D-, G- and C-strings have a rope core. The D-string is wound with titanium and the G- and C-strings with tungsten.
- A- and D-strings: soft and lively sound, enormously rich of modulation
- G- and C-strings: distinctively warm and rounded sound
- very quick response
- exceptional tuning stability and immediate playability

Cello rosin recommended for best results with Flexocor Permanent cello strings.

Thomas Stöhr Cello Set

In 2004, German cello maker Thomas Stöhr won the Musikmesse German Musical Instrument Award, using Pirastro strings on his cello. Since then, he and Pirastro have developed a special relationship. One of his favorite combinations of Pirastro strings is to combine both Passione and Evah strings to get a brilliant, powerful sound.

Learn more about Thomas Stöhr and his prize-winning cello:

VIOLINO FEATURES:

- Violino strings have a core made from a modern synthetic multifilament fibre.
- warm, smooth and round sound
- It is especially easy to explore the subtle differences of tone colors with these strings.
- low string tension
- excellent tuning stability
- Violino strings are very easy to play, have a soft and gentle touch and a fast response, allowing the strings to speak easily even at the lowest bow pressure.
- absolutely insensitive to variations in temperature and humidity

Obligato Violino Rosin

Forest honey colors. Mellow, rounded sound. Well suited for synthetic strings with low and medium tension.

WONDERTONE SOLO FEATURES:

- We have especially modified the core material used for Evah Pirazzi Gold, Evah Pirazzi, Obligato and Violino strings.
- The tone is direct, brilliant and clear
- no background "hiss"
- outstanding response
- outstanding tuning stability
- insensitive to variations in temperature and humidity
- Advanced-Steel E-string with round and warm sound

Oliv-Evah rosin recommended for best results with Wondertone Solo strings.

**PIRASTRO HARP & GUITAR STRINGS
ARE AVAILABLE BY SPECIAL ORDER**

Obligato
The All-Round Synthetic Core String

- modern synthetic core strings
- brilliant and full sound
- great tone volume
- excellent response

OBLIGATO FEATURES:

- Obligato strings have a core made from a modern synthetic multifilament fibre.
- Obligato strings sound warm and full, yet have a brilliant, rich overtone spectrum and focused tone.
- excellent playability and response throughout the entire dynamic range
- great tone volume
- excellent tuning stability
- absolutely insensitive to variations in temperature and humidity

* INDICATES STRING IS PART OF STANDARD SET

**Oliv Evah Rosin**

Dark olive color. Relatively soft, low dust forming, big sound, good grip with low noise. Well suited for gut strings and Evah Pirazzi strings.

OLIV FEATURES:

- The sheep gut core of the Oliv strings is manufactured, wound and polished in the traditional way, by hand.
- Musicians such as Ilya Gringolts use Oliv strings, as they offer the possibility "to explore the remotest corners of sound".
- The sound is brilliant. Oliv strings offer the typical beautiful sound of gut strings.
- The tone is rich and complex.
- Altering the gauge by 1/4 PM changes the tension by 3%.
- The silver D-string is richer in overtones and has easier response than the Gold-Aluminum D-string which is included in the set.
- Rigid, darker, and more powerful.

PASSIONE FEATURES:

- The sheep gut core of the Passione strings is manufactured, wound and polished in the traditional way, by hand.
- The core sound is full, round and warm and has a complex overtone spectrum causing brilliance and clarity and a great power of projection.
- Passione strings possess a fascinating diversity of sounds, which allows musicians to alter their tone as desired.
- The sound is big and powerful.
- very easy response on all levels of the dynamic range
- The accuracy of the contact point is easily manageable.
- Significantly reduced playing-in time: Passione strings are immediately playable compared to traditional gut strings.
- Altering the gauge by 1/4 PM changes the tension by 3%.

Pirastro Cello rosin recommended for best results with Permanent cello strings.

PERMANENT FEATURES:

- The Permanent viola A string has a single filament steel core wound with chrome steel. The other strings have a rope core wound with titanium (D), silver (G) and tungsten-silver (C).
- warm and round sound with a clear overtone spectrum
- good diversity of sounds, smooth and lively tone with a pliable left hand feeling
- great projection
- very easy response
- absolutely stable
- suitable also for electric or electrically-amplified violas
- Cello A- and D-strings have a single filament high-tensile steel and are wound with chrome steel.
- Cello G- and C-strings have a rope core wound with tungsten.

About Perpetual Strings

Our engineers were faced with the challenge of developing a string using ground-breaking construction and superior material composition, while creating the machines required to achieve this. Our musical intuition and expertise allowed us to realise this milestone in our developmental work.

We approached the field of violoncello strings from an entirely new perspective: Being able to forget your surroundings and focus on playing is what inspires and comforts a cellist. Therefore the key parameters we had to meet were easy playability, long durability, and perfect string-to-string harmony.

This new idea laid the foundation for us to make changes to the materials and processing techniques so that the strings acquired a further tonal dimension. This new dimension opens up the instrument to its full tonal colours and grants the musician the technical freedom to fully focus on their play.

Perpetual strings are characterised by great flexibility and an extraordinary tonal spectrum – from a sweet, warm tone to sheer endless power, everything is possible. The sound is like a large house with plenty of room for individual design. At the same time the tone is focussed and clear, the most delicate touches are instantly audible and the base warmth always present. The natural qualities and timbre of each cello are enhanced by the strings' great dynamics and intensity.

During the development we concentrated on reducing the break-in time. Our technicians did an impressive amount of research

THE CELLO SETS

The sound of the Perpetual Medium set is crystal clear and precise, powerful and grand. Each string responds easily and directly. This is especially impressive with the G- and C-strings which respond immediate to the lightest bow techniques.

The Perpetual Soloist set: For even more power and dynamics we offer the G- and C-strings in a Soloist version. In combination with the Medium A- and D-strings the sound gains radiance, brilliance, volume and presence. The ideal combination of brilliant fundamentals and soloist directness.

THE INDIVIDUAL CELLO STRINGS

A-string: The tone is clear for the first few minutes, then gently settles into a full, round, and lush dark timbre. A string that truly touches with its warm mellow tone.

D-string: A »strong« string with incredible depth and volume. Full of body and abundant power; always warm and strong. Delightfully easy to play.

G-string: A string that wants to be tamed, inspiring the cellist and giving the entire set a more brilliant and a tempestuous sound. A focused tone with a colorful spectrum and warm undertone.

C-string: Sonorous and deep, yet direct and clear. Very large volume. Even with the smallest of bow movements you can still hear the keynote. Long sustaining power and impressively precise sound.

Perpetual Violin Cadenza

The new Perpetual Cadenza violin set is characterized by its warm and very deep sound with a great wealth of colors and noticeably easy to play. In addition, these strings inspire the player with their brilliant, clear, and powerful sound as well as with their optimal response without resistance. The left hand feel is very light and soft due to its lower string tension. Shifting positions and portamenti can be played with noticeably less finger pressure. The overtones are rich and enable a wide range of color nuances while allowing the violin to resonate very freely.

GAMBA STRINGS

Strings made from sheep gut have been mentioned in the history of string instruments since earliest times. While nomadic peoples used tendons and horse hair, following the finding of an Egyptian lute from 1500 BC, we know that the Egyptians had already mastered the techniques of gut string manufacturing.

It is possible that a gut rope made of thin twisted gut filaments was used for the lower strings in the later centuries.

The metal wound strings which we use today did not start to be developed until the middle of the 17th century, at the time of Stradivarius.

To offer you this authentic stringing at today's high quality we have reconstructed these developments and incorporated them into our gamba string program.

Eudoxa rosin recommended for best results with all Gamba strings.

Fundamentally even today it is still possible to use plain gut strings for the lowest strings of the gamba, however the stiffness and thickness of the mono-filament of the gut string is a considerable impairment to playability of the deeper notes.

It is only since 1660 that spinning with copper has evolved. However, the most popular winding is silver-plated copper wire, which has the advantage of the silver coating combined with the sound quality of the copper string.

For studio takes we recommend silver wound gut string with a polished surface. They are quiet even as your fingers change position on the fingerboard. However, it has only been possible to manufacture this sort of string since the 20th century.

NOTE REGARDING GAMBAS

Treble gamba size similar to violin. Alto gamba size similar to viola.

Bass (tenor) gamba size similar to cello.

Double bass gamba size similar to double bass.

TONICA FEATURES:

- Tonica strings have a core made from nylon.
- They produce a lively well-rounded sound, perfectly balanced across all four strings.
- Responding instantly to any bowing style, they reward both player and listener with an open and direct sound.
- With substantially reduced background 'hiss', players can sustain a more even tone helping to achieve smoother string crossings.
- While giving positive feed back to your left hand, Tonica strings remain very easy to play right up into the highest positions.
- Projection and brilliance have been upgraded.
- However, this excess does not mean that the Tonica has lost its warmth.
- Playing pianissimo has considerably improved.
- All bow strokes are possible resulting in smooth crossings from one note to another.
- Easy right hand articulation and tone attack.
- Due to their medium string tension Tonica strings are suitable for all instruments.
- Insensitive to variations in temperature and humidity

- All bow strokes are possible resulting in smooth crossings from one note to another.
- Easy right hand articulation and tone attack.
- Due to their medium string tension Tonica strings are suitable for all instruments.
- Insensitive to variations in temperature and humidity
- Standard vibrating length 37 cm ideal for full-size violas. The 40 cm and 43 cm vibrating lengths are for large-pattern, long string length violas.

Tonica Rosin

Metallic orange. Medium hardness and grip. Developed for our Tonica strings.

As the leading supplier of the largest string manufacturer in our industry,

If Pirastro makes it,

Howard Core Company can get it for you!

If you do not see the string you are looking for listed in our catalog, please let a member of our sales staff know and we will be happy to get it for you.

PIRASTRO ROSIN INFORMATION

High quality rosin allows for perfect bowing without scratchy sounds, especially if only a thin layer of rosin is applied. The general rule is:

- violinists and violists use a harder, dryer rosin
- cellists use a medium strong rosin
- bassists a softer rosin

Another important aspect for choosing the right rosin is the core material of the string that are being used:

- steel strings are easier played if you use a hard, dry rosin
- for synthetic, gut and gut wound strings use a softer rosin

This chart shows the contrasting grades of our rosins. For more detailed information about the most appropriate rosin to use with your favorite Pirastro strings, please refer to the individual string's specification.

Moreover, experienced players prefer softer rosin when playing in a studio and harder rosin in a concert hall. Hard rosin works best in tropical climates while soft rosin is good for cold climates.

Each cake of rosin is glued onto a soft cloth which then is attached to a hard plastic grip. This prevents the fingers of the musician to get exposed to rosin dust and also makes it easier to apply the rosin.

We develop our own specific rosin and design it according to the technical requirements of our different string lines. That is also the reason why we name our rosin after the brand names of our violin and viola string lines.

Gold Flex Rosin

A slightly harder rosin mixed with gold dust; Pirastro's #1 rosin for general use.

PRIM "LISA" E STRINGS

Available in soft, medium & hard.

This E string was developed from a special stainless alloy/manufacturing process that was developed by the oil industry for use in very harsh conditions. It is extremely corrosion resistant, yet has more flexibility than a typical stainless steel string. Typically stainless E's may be somewhat brittle, or have plating issues. As the plate decays/falls off, or as the string itself oxidizes, the string loses mass and becomes false. With the "Lisa" E string you will feel the perfect surface, and it will stay perfect for the whole lifetime of the string.

Corelli Alliance Vivace Violin

A breakthrough in the technology of violin stringmaking!

4/4 only

Available medium-light, medium, & forte

The sound of the Alliance Vivace has the warmth and focus of the best gut strings with the advantages of exclusive high-tech materials: a composite multifilament core wrapped with a combination of sophisticated metal wires, the accuracy of the manufacturing process guaranteed by laser control. Players enjoy: very fast and accurate bow response in pianissimi, fortissimi, spiccato, sautillé, staccato passages; increased possibilities for nuances under the slightest bow pressure; a perfectly defined elasticity and stiffness which generate depth, density of sound and give the feeling of volume; a rich and clear sound in all registers, well-balanced from string to string.

Corelli Solea Violin
Synthetic Core Strings

Available 4/4 Only

Under the bow, string flexibility feeling gives a comfortable ease of play, while offering the required string resistance under the fingers. The perfectly adjusted string stiffness meets the requirements for a swift response, facilitates a large range of nuances within the expanded color spectrum, and perfect sound emission from pianissimo to fortissimo.

The homogeneity of these strings handmade in France is present when passing from one string to another: sound volume regularity, density and harmonics, are present from the low positions to the highest positions throughout the entire length of the fingerboard.

The E string is made from a slightly more flexible steel with high grade of carbon content. The brilliant sound not aggressive, allows an enlarged range of nuances even in case of a powerful playing.

The wound A, D and G strings are made of new materials: a combination of very new innovative metals. The double layers of innovative raw materials surround a synthetic multifilament core (specific polymer) whose elasticity and density have been designed to give a rich and bright sound rendering.

Dominant Pro Violin

Immediately after stringing, the string set sounds bell-like and fills the room. In the first three to five hours of playing, the strings feel a touch softer and sound a little warmer than they do for the rest of their lifespan. Then the strings open up, sound more brilliant and open, and feel a little tighter beneath the fingers. The bell-like sound that fills the room decreases slightly in the last third of the strings' life and they sound more direct – from this point on, the tonal character of the strings barely changes.

4/4 Medium only

Vision™ Solo Violin

"From the first moment of trying them out, the playing satisfaction level rose dramatically. They are focused throughout the range but never too edgy. These are viola strings which combine depth and clarity. And the ultra quick response - even in pianissimo passages - make them a joy to play." - Geoffrey Ovington, noted luthier and player

Peter Infeld Bass

Our PETER INFELD® strings for double bass make you shine in many different ways. The strings are very reliable and have a remarkably powerful sound in the mids, with a centered tonal core. They boast a substantial amount of sound colors that remain controllable for you as a player at all times. Based on our legendary spiral core, we have developed these strings with a new combination of materials to achieve their outstanding properties: for jazz bassists they offer growl and sustain while being easily bowable and providing powerful projection for the orchestra player. Their extraordinary projection lets you all shine.

Dynamo Violin

Ideally suited for Orchestra Players, Chamber Musicians, and Soloists:

- They offer a broad sound AND an excellent response.
- They have a wide dynamic range AND you can modulate sound colors all along to their full extent.
- They sound great on most old AND most new instruments.
- Their sound will blow away the musician AND the audience.

Präzision Mandolin

Medium - SOLD ONLY IN SETS

The strings are flat wound on chrome steel and highly polished except the plain E-string of the Mandolin set, which is made of tin plated silver steel. They have a steel core made of special alloy with high elasticity and durability. The sound of the Mandolin strings is clear and brilliant. The Mandola strings are particularly smooth, round and voluminous. All strings are easy in handling and have a long life span.

WARCHAL AMBER VIOLIN

4/4 Medium Only

The Amber string set has been developed with the aim of achieving the sound quality of the best gut strings without any tuning instabilities. The set features W-Core®, a completely new core material developed by our Research & Development team.

The sound is rich and warm, but still has texture. The strings also feature a distinctive high quality silking design.

| Item # | Description | \$ - List |

WARCHAL AMBER VIOLA

Synthetic as well as metal core A strings are available. The metal core A string benefits from our helix design which gives the metal core exceptional elasticity and results in a new level of sound quality. The synthetic core A string and the rest of the set uses our new W-Core® material.

The Amber string set is complemented by an exceptionally beautiful and luxurious silk winding design which is a jewel for your instrument.

WARCHAL AMETYST VIOLIN

4/4 Medium Only

High Quality synthetic core strings. Ametyst strings offer a pure and focused sound which is brighter than Karneol. Although they are intended for better instruments, they will improve the sound of all levels of violins. They have a synthetic core, and normally take approximately three days to achieve tuning stability and optimum tone quality.

| Item # | Description | \$ - List |

WARCHAL BRILLIANT VIOLIN

4/4 Medium Only

The Brilliant advanced synthetic core set is intended for players who seek the most projecting sound. It also offers quick tuning stability. Synthetic core strings need about three to four days to settle in before achieving full tone quality. Two D strings are available. D - hydronalium which provides a projecting sound with plenty of attack when needed. D - silver which provides a warmer and mellower sound.

HANNABACH CLASSICAL GUITAR STRINGS

 **Exclusive !**

Some of you already know that Hannabach is one of the finest manufacturers of classical guitar strings in the world. So, when Hannabach asked us to be the Exclusive Distributor in the United States, we were intrigued!

After much deliberation we decided that, while we do not normally handle guitar strings, it would not be a big leap from the violin world to the classical guitar world, at least as far as distributing strings is concerned. We know of many dealers who handle both product lines successfully, and in our continuing attempt to be your full service, one-stop supplier of quality products, we believe that this opportunity is good for both us and our Valued Dealers.

It is a fact that price and availability are driving factors in how well a product line will perform in the marketplace. Howard Core Company is perfectly positioned to be able to bring Hannabach strings into the United States as inexpensively as possible, and we can maintain an adequate supply on hand so that availability will never be an issue!

Hannabach will make special order strings on request. The following information must be provided in order to accommodate special order requests:

- 1 - Precise scale length (vibrating between bridge and saddle)
- 2 - Total string length
- 3 - Required string tension, in daN (decaNewtons)
- 4 - String sound required (if possible, provide pattern)

5 STANDARD TENSIONS:

Red Label SHT = Super High Tension

Blue Label HT = High Tension

Black Label MT = Medium Tension

Green Label LT = Low Tension

Yellow Label SLT = Super Low Tension

Some strings also available in MHT (medium high tension) and MLT (medium low tension), as indicated. Label color varies for these tensions.

SOUNDSCAPE

CHOOSE YOUR RIGHT STRING.

Octaveguitar, Quartguitar, and Quintguitar are all available.
PLEASE CALL!

IF YOU DON'T SEE THE HANNABACH STRING YOU NEED LISTED HERE, PLEASE CONTACT US.

SERIES 725 GOLDIN

Medium-High (MHT) tension only.

The trebles (EBG) are made of golden yellow SUPER CARBON. They sound softer & warmer than conventional carbon strings. The basses (DAE6) are characterized by a novel, high-density and highly resistant plastic core. Winding wires are made of "GOLDIN", a newly developed golden yellow metal alloy (100% nickel and cadmium-free). Basses sound clearly and brilliantly.

SERIES 728 CUSTOM-MADE

Low, Medium & High tensions available.

Hand-made classic strings for pro players. E1, B2, G3 trebles—crystal clear and finely calibrated. Newly developed basses: highly resilient plastic fibres wound with hard silver-plated, round-section wires.

To improve visibility, one end of all E1 strings is color-coded. With this series, D4 strings come without loosely spun ends.

SERIES 950 TITANYL

DISCONTINUED - WHILE THEY LAST!

Treble strings (E1, B, G) are made of a new polyamide mixture – thus the light grey color – and of course precisely round. They have a clear, distinct sound, openly brilliant.

Bass strings (D, A, E6) These strings have a high strength, flexible core and are wound with a newly developed "long live" silver alloyed wire. The bass strings have a sonorous tone development with beautiful, clear overtones.

| Item # | Description | \$ - List |

AIR-SEALED IN BAVARIA

Hannabach has just created a new entry-level set using all their experience and research, quality manufacturing, and concept-of-tone to produce a price-friendly set that anyone can buy and enjoy. Hannabach quality in new packaging: ecological, air-sealed - always fresh!

| Item # | Description | \$ - List |
|----------|----------------|-----------|
| HAN500HT | High tension | 17.74 |
| HAN500MT | Medium tension | 17.74 |

SERIES 7004 DURABLE

Medium & High tensions available.

Durability, particularly regarding the D4 string which is subject to such severe demands, is made possible for the first time through the use of a very hard alloy. Combine the high-performance "Durable" string with the set which you prefer, and you will find that the premature replacement of a D4 has become a thing of the past.

The "Durable" fits in harmoniously, in terms of quality and tension, to the broad spectrum of HANNABACH handmade strings. The two different tensions, MT and HT, are immediately available thanks to the speed with which they can be tuned, and because of their highly resistant alloys (which even resist the perspiration of the hand) will be a match for any situation for a long time to come.

| Item # | Description | \$ - List |
